

Project: Secure Seat Booking (SSB) -Team-2

Sprint Retrospective – Sprint-1

Attendees:

Divyashree M D
Akshay Kumar K
Dheeraj B N
Varshitha J
Rachamadugu Sanjay Guptha
Banapili Saikumar
Archies Singh
Mihir Kumar
Pranav Pandey

Date: 30-03-2023

Prepared by – Akshay Kumar K

Agenda:

1. What went well during this sprint?
2. What didn't go well during this sprint?
3. What did we learn during this sprint?
4. What should we start doing in the next sprint?
5. What should we stop doing in the next sprint?
6. What should we continue doing in the next sprint?
7. Action Items for Next Sprint

1. What went well during this sprint?

- Backend API's logic went well as per plan, no carry over for successive sprint.
- Used of DAO class effectively to build complex SQL query using JOINS.
- Kubernetes networking part worked as intended.
- Seat booking validation for selecting dates archived in front-end.

2. What didn't go well during this sprint?

- Integrating react with backend for authorization was failed
- Proper time for daily Scrum have not followed
- Retrieving of current available seats in react

3. What did we learn during this sprint?

- Team work and coordination.
- Proper work structure followed through the sprint
- More knowledge on technology.
- Proper coding standards
- Effective communication with Subject Matter Experts (SME's)

4. What should we start doing in the next sprint?

- Work more in effective way.
- Consider time as a major aspect.
- Interaction with other domain teammate for knowledge sharing.

5. What should we stop doing in the next sprint?

- Avoid Code conflict while using Git.

6. What should we continue doing in the next sprint?

- Team Sprit to complete the goal.
- Completion of assigned task on time

7. Action Items for Next Sprint

- Reinitiate the proper scrum meeting time - [Responsible Team Member] - Akshay Kumar K
- Use JWT Token for Authorization- [Responsible Team Member] - Sanjay guptha
- Do more R&D for betterment of Project - [Responsible Team Member] – All Attendees

Conclusion:

The sprint retrospective meeting ended with a review of the action items, identified successes, issues, and lessons learned from the sprint. The team identified specific actions to implement before the next sprint. The team is committed to improving the next sprint's performance and ensuring the project's success.
